Advanced Font-Family

font-family: "Courier New" ; . . . . . ; generic font-family

→ what if browser doesn't support it.

{if first not supported, goes to second . . .

generic are supported by all

fallback one}

→ serif
→ sans-serif
→ cursive etc

If spaces in between → (eg) "Times New Roman"
give in double-quotes

→ else Times
(no need of quotes)

Web-fonts {(eg) Google Fonts}

↳ surety that this font will be available

↳ can embedd it

Get embed code

Download all

selected
↓
Web
<html> → Copy-paste it.

can copy and past it in folder in the folder we are working on.

or Use @font-face {

font-family : "Sedan SC";

src : url (./sedanSC-Regular.ttf);

or(Sedan SC-Regular.ttf)

Web Icons

Google Icons

↳ can download and save it → home_icon.png

< img src ="home_icon.png" /> ↳ here they break.

If we want to change its color

- paste in the head { from embedd }
- can go to styles → span { color : blue; }
- span: hover { color : brown }

pixels don't break

Note :→ Can use fontawesome.com → better icons.

Copy link and paste in head.

→ can change color as well.

i { color : blue

}
